

Stepping forward with **LS Communication.**

Since 1996

LS COM

LS Communication (Leading and Solution) Ltd.

We, all the members of LS Communication Ltd. have been constantly working on technology development and innovation since the launch of coil business in 1996. Also, we are being recognized for our expertise and skills based on our excellent human resources and technology development. We will persistently put our efforts to satisfy the customer's needs and expectation with the high-quality products and services.

We aim for

Recognition from customers

Love from staff members

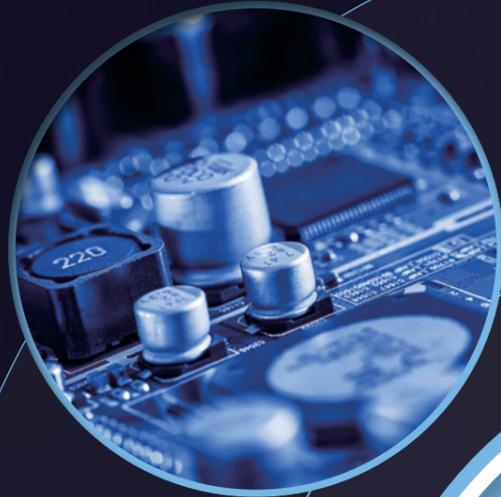

Small but strong company.

From all the executives and staffs of LS Communication Co., Ltd.

- 2019** Selected as Small Promising Company of Anyang-city
Selected as Pre-world Champion (MOTIE, Korea)
Joint technology development:
Smart Factory Cooperation Package/Robot part (MOTIE, Korea)
AEC-Q200 approved : Power Inductor
- 2018** Development a inner type Galvanic Isolator inside STB, PCT approved
IATF 16949 System, approved
Start of IoT Device & Solution business (Home IoT, IoT Security)
- 2017** Development Dccsis 3.0 & 3.1 Switchable module
- 2016** LS Comm VINA ISO(9001, 14001) approved
Joint technology development:
Smart Factory Energy Management System (MOTIE, Korea)
Start of IoT Module Business
- Development Customizing IoT Module
(BLE, WiFi+BLE Combo, Wi-Sun Module.. etc)
- 2015** Business expansion of Home Network System
- Built-in Wireless AP, Switching Hub, 8P Modular
Establishment of LS Comm VINA (LSV)
- 2014** Start of RF Module of overseas & domestic Cable STB business
Establishment of Tokyo LS (LST)
- 2012** Start of Optical TV Head-end and Network System
- 2008** Selected as Small Promising Company of Gyeonggi-do, Korea
- 2007** Start of Cable TV Head-end and Network System
- 1996** Establishment of LS Communication and launch of Coil, Inductor business

Coil

We have been continuously working on technology development and cost reduction since the establishment of the company. Based on our excellent human resources and accumulated experiences, we provide not only standard products but also customized products with the best quality and reasonable prices. We have a wide range of inductor including high quality, high current inductor, balun and choke coil. We recommend you personally experience our SMD products which can be lightened and minimized for your circuit design.

RF Module

We are developing Diplexer & Triplexer Module(RF Module) needed for STB in person. We have products to meet Docsis 3.0/3.1 Standards, and provide Switchable Diplexer of Dual Band Type which supports Docsis 3.0 & 3.1 simultaneously. With the use of our products, you can design and build up the best impedance matching needed for STB structure in the optimal time.

Business Area

LS COM

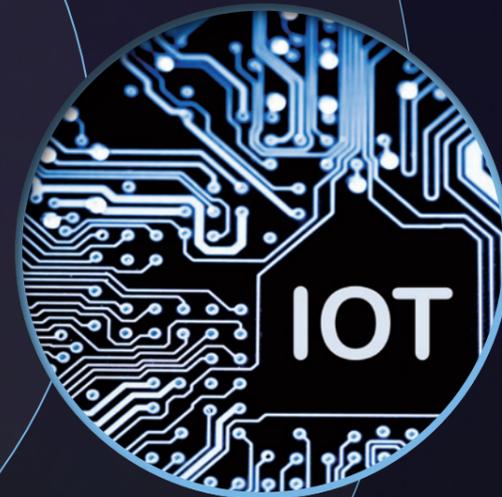

TV Head-end & Network System

We have filters with their widely recognized quality and features, which utilize only necessary frequency range while removing other unnecessary frequency ranges. We have light optical communication equipment, digital equipment, amplifier, allotter and turnout for sending cable relaying signals or composite cable broadcasting signals which are transmitted bidirectionally with a coaxial cable transmission line. Also, the quality of our products are recognized in several countries including Japan, America and even Europe. We currently completed the product development of 3.2GHz using frequency range for fortifying the foundation of the world's best product.

IoT Module

We offer customized IoT module to the customers looking for the products or solutions based on IoT. We have various products available for sales, from bluetooth module for controlling electronic devices to combo module which supports Zigbee, WiFi, Wi-Sun, and both WiFi and BLE at the same time. We will do our best to meet our customers' needs effectively, efficiently.

IoT Device

We offer a wide range of products based on BLE and combo module, which are linkable with many kinds of sensors for the customers looking for the products to establish services by type and circumstance. Also, we have various products and services from products for organization of Smart Home to solutions for build-up of security system in stores or offices. Moreover, we provide any customized communication system our customers request including Zigbee and WiFi.
